American Complacency Condemned Four Years After Hungarian Revolt

Four years ago Hungarian students and workers went to war with Soviet Communists who dominated their country. Armed with a few appropriated guns, stones and home-made gasoline bombs, they cowed their rulers and seized control of Budapest.

After Oct. 28, 1956, they tasted freedom, first cautiously, then greedily. Five days later Russian tanks clinked back to the city to annihilate the revolutionists.

After years of promises and cajoleries from Radio Free Europe, a satellite country actually dared to drive the secret police and the communist army from their land. Not by an organized army was this accomplished, but by workers who wanted higher pay and warmer clothes, by patriots who desired an end to Russian domination, and by wiry children who preferred to kill tanks even if it meant death for themselves.

As the world's widened eyes followed the struggle on the Danube, Henry Cabot Lodge cried, "The United Nations cannot remain a passive spectator to the events in Hungary."

And while desperate freedom fighters searched the skies for US paratroopers, the New York Times reported, "The big Western powers appear to have decided to keep the Hungarian question to one side for the moment, until such time as it becomes clear that the anti-Soviet rebellion has either attained its objectives or has been checked."

With no help for the patriots, Russian tanks systematically machinegunned the city.

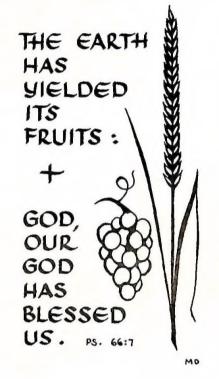

And now the world knows that the Soviet Communists are murderers. With Hungary as proof, everyone knows that Russia must kill to maintain power.

But how can we explain the new Communist "babies" - Cuba, Laos, Ghana, perhaps? These have been born since Budapest showed the world Russia's butcher knife.

Americans love to talk about freedom. But we watched Hungary stand up to be crushed, not intervening, for fear of World War III.

Did the United States do enough then? Four years ago, while Hungarians were dying because they squirmed under the Russian thumb, Americans sat in warm, carpeted homes and kept eating.

Did we do enough to fight atheistic Communism then? What are we doing about it now?

An NF'er Speaks Up

NFCCS National Pluralistic Program Emphasizes Individual Responsibility

American society is made up of many small groups-many races, many nationalities, religions, special interest groups. This large whole, an aggregate of numerous smaller parts, is a pluralistic society. Religious pluralism is but one aspect of the larger area of pluralisms.

The National Federation of Catholic College Students felt that the study of pluralism, specifically religious pluralism, was of such importance they have devoted to it an entire program.

Under the name of Contemporary Issues, the study is one of universal concern and transcendent importance. It is to be developed in depth and extended over one complete academic year, with the most significant aspects to be conducted on the individual campuses.

Programs may be planned on the regional and national levels, but the campus program is the only one which can reach an effective number of students. A study of this nature will be as effective as the number of individual students it affects. For this reason the campus stands out as the site of oper-

The program aims to develop in each participant a greater awareness of the unique American society in which he lives, his role in the society, and some appreciation for the beliefs held he others.

This 1960-61 program is entitled, "An Understanding of Our Times: Catholic Responsibility in a Pluralistic Society, The scope of study includes definition and clarification of the precise areas of agreement and disagreement among various groups constituting our plural istic American society.

The goal of the program is to provide participating students with greater knowledge for more harmonious inter. group relations.

Clarke students have had the privilege of hearing Father Max Jordon speak on "Christian Unity" as part of the Cul. tural Events program. Further oppor. tunities will be offered on campus through discussions and forums sched uled for the coming months.

Available in the library are copies of the booklet "An Understanding of Our Times . . ." with articles on pluralism and a bibliography for further reading, Written by both Catholics and non-Catholics these articles and books discuss the basic issues: the nature of pluralism, the position to be taken by religious bodies in a free society, a view of church-state relations in America, the role of sectarian schools in a free society, and discussion of the Protestant-Catholic dialogue.

With the constant and rapid change of modern living and our shrinking world, we Christians-in fact, all people everywhere-are coming closer together. Living in harmony requires that we understand our own position and come to respect and tolerate the positions of

Catholics will be looking to their Catholic college graduates for leader-ship. The NFCCS is extending an open invitation to all Clarkites to take part in this study of pluralism. Through discussion, participation and reading, each student has the opportunity to bridge the space between classroom knowledge and her role in the lay apostolate.

Spirit of Thanksgiving Buried In Materialistic Preoccupation

Inflation, cold war and juvenile delinquency fill our papers. Reports of crimes of violence unceasingly come over the air waves. The continual challenge of space presents new ethical and theological problems.

In the face of all of this, Thanksgiving Day, 1960, swiftly approaches. What thoughts will pass through the minds of Americans on this day?

Unfortunately, most of us will be too preoccupied with turkey and pumpkin pie to turn our thoughts towards the Giver of all gifts. The parade of Pilgrims and patriots recedes into the background as children sit

Demonstration Airs Closed Circuit TV

Members of the Clarke college faculty got a peek into education for the future, Nov. 15, when they watched a demonstration of closedcircuit television in Catherine Byrne hall.

Direct wire TV is a versatile audio-visual aid which can be scheduled for a variety of uses in a number of locations throughout one day.

The TV camera may someday be used at Clarke to extend the range of instruction beyond one classroom, or may allow student teach-

ers to observe teaching techniques without being in the actual class-

It may help speech and drama students learn TV techniques, or give 30 science students "front row center" views of an experiment.

Faculty members from other educational institutions in Dubuque were guests at the demonstration.

IES Offers Choice Of France, Vienna

Institute of European Studies has announced that a Paris Honors Program in Contemporary European Civilization will be added to their program of undergraduate study abroad next year.

Similar to the Vienna program with its Field-Study trips, the Paris program consists of classes in philosophy, history, political science and fine arts, including literature and drama.

Integrating seminars parallel each of these core subjects. French language courses and optional studies in theology are also

The faculty consists of professors from various branches of the University of Paris. In addition to the core curriculum offered by the Institute, students can enroll in various Institutes of the University of Paris in accordance with their respective needs, interests and qualifications.

The Paris Honors Program requires the student to work more intensively and a "B" average is required for admittance, as well as some knowledge of French lan-

Sister Mary St. Rose, BVM, dean of studies, has application blanks and further information concerning IES programs.

Business Realizes Educational Needs

Annual C Will Here Iowa College foundation, of which Clarke is a member, had its annual dinner in Des Moines recently.

George M. Umbreit, president of the Maytag company accepted the foundation's 1960 Honor Award which went to his company "for meritorious service and leadership in strengthening the independent colleges of Iowa."

Emphasizing society's responsibility to higher education, he said there are "many reasons" why busi. nesses and corporations should contribute directly to its support.

Corporations can justify finan. cial aid to education, because "it is vitally important that we preserve in America the kind of society in which private enterprise may prosper." This nation's progress has "resulted from a climate in which there has been the widest latitude for competition among intelligent and well-educated indi. viduals."

Secondly, he continued, businesses and industries have helped create the need for higher educa-

It is becoming less likely that college alumni or wealthy philanthropists alone can meet the entire financial needs of colleges. "Under present tax structures," he said individuals seldom are able to pile up tremendous fortunes which they can distribute on the basis of individual philanthropy."

Changes which have made it more possible for corporations to assume part of this responsibility include the Internal Revenue Act of some twenty years ago which makes tax exempt corporate contributions to scientific, educational and charitable agencies up to 5 per cent of net income. Today, Mr. Umbreit said, business and in dustry contribute at a rate of halfbillion dollars annually to philanthropic causes.

In suggesting how best this assistance may be offered, Mr. Umbreit cited support of the Iowa College foundation, composed of 21 member colleges, including Clarke, and similar organizations as an effective method of aiding education. Corporations cannot afford time to investigate needs of individual colleges, nor are they al-ways in a position to judge the merits of these needs.

His company's philosophy, Mr. Umbreit said, is that, first, its contributions to higher education should be on an unrestricted basis. Secondly, Maytag believes it wisest to support educational institutions in the area in which it is located. Collegia Welcome
